DIP--From whom ever you get your Bulbs--dip them for 6 hours in a solution of 1 tablespoon of Lysol mixed well in one gallon water--plant while wet--if you permit them to dry the water evaporating will cause the Lysol to dry in concentrated form and injure the Bulbs.

SPRAY your glads weekly when in 3rd leaf to kill thrip. 2 ounces Tarter Emitic, 6 oz. Brown sugar, mix well in 3 gallons water.

STORING YOUR BULBS--soon as bulbs are dry and cleaned (2 weeks after digging) dust them very lightly with powdered Sulphur--in addition we also dust them lightly with 5% DDT dust. The sulphur is a fungicide and will help prevent mold--the DDT is an insecticide and will destroy thrips--in small lots under 1000 bulbs another splendid method is to put a gallon of Bulbs in a paper bag with a teaspoon full of naphthalene. Tie the top of the bag tightly for 4 to 6 weeks, then open and spread out. If you use boxes, then they should be covered tightly with canvas or something to hold in the fumes which is what kills the thrip.
